

IMCOS-7001-V2 PA/GA & TB Access Panel

Overview

IMCOS-7001-V2 is an access panel designed for announcements, pre-recorded messages broadcast through the IMCOS / SONIX public address and alarms triggering as well as talk back main station. Equipped with 25 pushbuttons customizable keypad and one additional pushbutton dedicated to emergency call or alarm enabler function. Designed to meet and exceed the requirements of ABS, BV, CCS, DNV-GL, LR, RINA, Norsok and UKOOA/PFEER.

Features

- The panel includes:
 - 25 pushbuttons polycarbonate illuminated keypad
 - backlight intensity dimmer
 - volume control for external loudspeaker when integrated with talk back system
 - emergency call illuminated pushbutton
- Different microphone options: handheld with PTT pushbutton and socket or fixed gooseneck
- Different installing options, desk or flush mount
- Modulation LED for speech monitoring available as option
- Multiple remote panels can be controlled over a proprietary network via RS 485 data interface to the IMCOS main electronics
- Providing local loudspeaker bypass to avoid audio feedback
- Deployable with redundant connection to distributed PA/GA systems
