

## IMCOS-3004 Back up audio switcher PCB

### Product description

IMCOS-3004 Back Up Audio Switcher is an audio detector for automatic audio line change-over from MASTER to BACK-UP.

### Features

- Part of IMCOS-3002 system controller assembly, IMCOS-3004 is able to guarantee a complete redundancy in case of fault
- Continuously monitors the audio loop, in order to detect faults
- Sends switch command to IMCOS-9020 line switcher

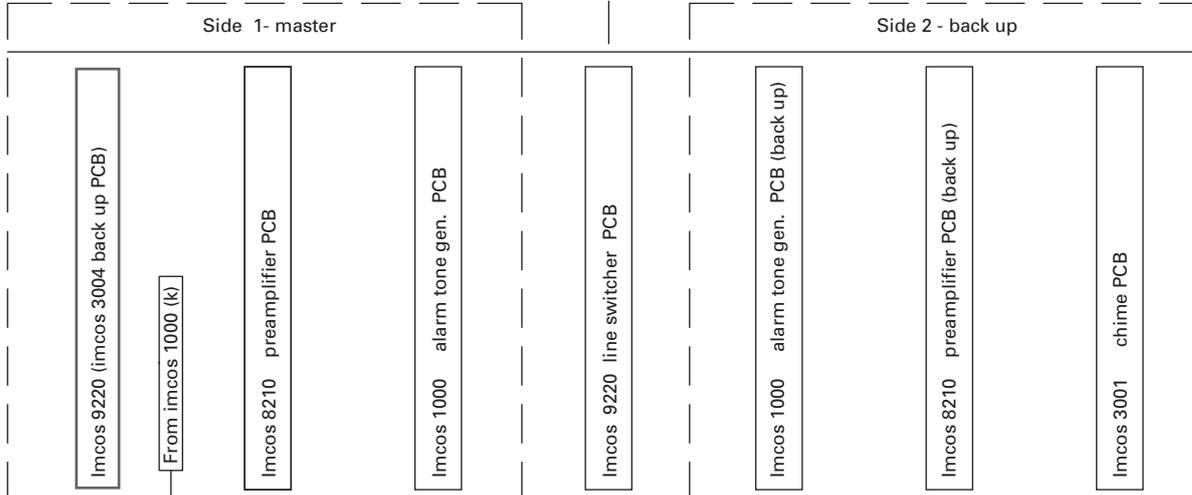

*Powering Business Worldwide*

## Specification

Type	PCB card
Mounting	Part of IMCOS-3002 controller assembly. fitted in one slot of IMCOS-7P connector PCB
Power supply	24 V DC
Dimensions	Width 110 mm, height 87 mm

## Positioning inside IMCOS-7P

Imcos 7P connector PCB - 7 slots - upper view  
(Fitted inside imcos 3002 - controller assembly)

## Ordering requirements

The following code is designed to help in selection of the correct unit. Build up the reference number by inserting the code for each component into the appropriate box.

### Model

IMCOS-3004

All specifications, dimensions, weights and tolerances are nominal (typical) and Gitiessse reserve the right to vary all data without prior notice. No liability is accepted for any consequence of use.

IMCOS™ System is type approved by seven marine class societies.
