

Clifford & Snell

Yodal[®] Ex YL5IS Hi-Vis

Intrinsically Safe Device

**Audible signal for use in Potentially
Explosive Atmospheres**

PRODUCT FEATURES

- Max sound output 105 dB (A) 1m
- IP66 rated**
- LED Long Life Array
- 32 selectable tones meeting international regulations
- 2 stage alarm
- Flame retardant ABS & Polycarbonate enclosure
- Low current consumption
- Lenses available in 8 colours
- ATEX & IECEx* Approved
- Zones 0, 1, 2, 20, 21, 22

Ambient Conditions

Operating temperature	-25 °C to +40 °C
Storage temperature	-40 °C to +70 °C
Max. Relative humidity	95% at 40 °C

Acoustic Data

Maximum Volume Output	105dB (A)
Volume Control Adjustment	-15 dB (A)
2 Stage Alarm with predetermined second stage as standard.	

Luminous characteristics

Light Emitting Diode	8 off LED Array
Flash Rate	60 FPM (1Hz)
Lens Colour	Amber, Yellow, Red, Green, Opal, Blue, Magenta, Clear

Line integrity on DC systems

If line monitoring is required an end-of-line resistor is needed and should have a minimum resistance of 750 Ohm and rated power of at least 2W or a 4700 Ohm and a rated power of at least 0.4W. For end of line monitoring, a suitable barrier/isolator will be required that allows for reverse polarity connection (see page 3 for Moflash recommend barriers).

Mounting / Installation

Devices should be mounted to a suitable flat wall or bulkhead avoiding any undue vibration and using the two lugs projecting from the case. The lugs are bored 8mm on 153mm centres. The minimum length of fixing screw required is 25mm. To maintain the IP rating of the enclosure, the cable entries must be fitted with a suitably rated cable gland (not included). Max cable termination 2.5mm².

To maintain the Intrinsically Safe integrity of the product a suitable rated Galvanic Isolator or Zener barrier must be used (see page 3 for Moflash recommend barriers).

The YL5IS Hi-Vis can be wired as individual components (i.e. sounder and beacon on separate channels) or the sounder and beacon can be wired together to activate at the same time on one channel, however the entity parameters must be observed for both variations.

Systems Installation

The Sounder must be installed in accordance with the latest EN 60079-0 & EN 60079-11 standards or equivalent IEC standards, with consideration for any local installation requirements, and should only be carried out by appropriately competent and qualified personnel. Moflash Signalling is not able to offer any assistance with additional system parameters beyond that included on the installation sheet, and can not give advice on individual system installations. The system integrators should be contacted for any additional installation requirements.

ACCESSORIES

WARNING: Connection into these Sounder/Beacons must be via a suitably rated Zener Barrier or Galvanic Isolator. Never connect the sounder or beacon directly to the voltage supply without a barrier in place. Failure to do so will result in permanent damage to the PCB & void the warranty.
